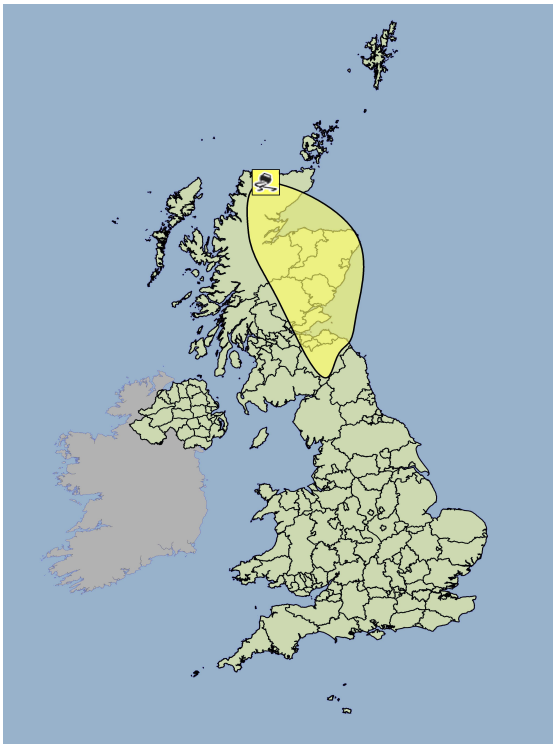
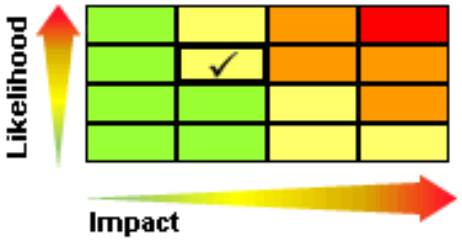
National Severe Weather Warning Service





Chief Forecasters Assessment
The band of frontal rainfall affecting parts of eastern Scotland will slowly clear away eastwards later on Sunday, leaving many surfaces wet or damp. Clearing skies overnight will then allow temperatures to fall below freezing, leading to a risk of ice formation on untreated surfaces.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **20:00 on Sun, 19th Jan 2014** until **10:00 on Mon, 20th Jan 2014**

Icy stretches are expected to form on untreated surfaces overnight and into Monday morning.

The public should be aware of the potential for difficult driving conditions.
